

# HOW TO USE SMELLEZE GRANULES & POWDER TO RID INDOOR ODORS

## 1. OPEN SIFTER CAP

SMELLEZE is extremely easy to use. To apply, simply open the handy sprinkle/pour top on the container and you are ready to absorb and deodorize any tough indoor smell.

## 2. SPRINKLE & DEODORIZE

Sprinkle SMELLEZE generously on smelly surfaces to draw odor out. Allow it to work for 2-24 hours. The longer the better. SMELLEZE is 100% safe for people, pets, and the planet!

## 3. VACUUM OR SWEEP

Vacuum or sweep the used SMELLEZE and you're done. Repeat the treatment, if necessary, until all the odors are removed. It's that easy!

## 4. BONUS: ABORB SPILLS

Scatter SMELLEZE generously on any spill to absorb and trap it. Then sweep up and discard. It can be used anywhere you have accidents and odor.
