

HOW TO USE SMELLEZE GRANULES TO CLEAN UP SPILLS

1. OPEN SIFTER CAP

SMELLEZE is extremely easy to use. To apply, simply open the handy sprinkle/pour top on the container and you are ready to clean-up spills.

2. SPRINKLE

Just scatter SMELLEZE liberally on and around the spill and you're done! It will start working immediately.

3. ABSORB SPILL

Let SMELLEZE do its job. It will continue to absorb and encapsulate the spill until it becomes fully saturated.

4. CLEAN

Sweep up SMELLEZE and dispose properly. Repeat the treatment, if necessary, until the entire spill is cleaned. It's that easy!
