

HOW TO USE SMELLEZE GRANULES TO RID OUTDOOR ODORS

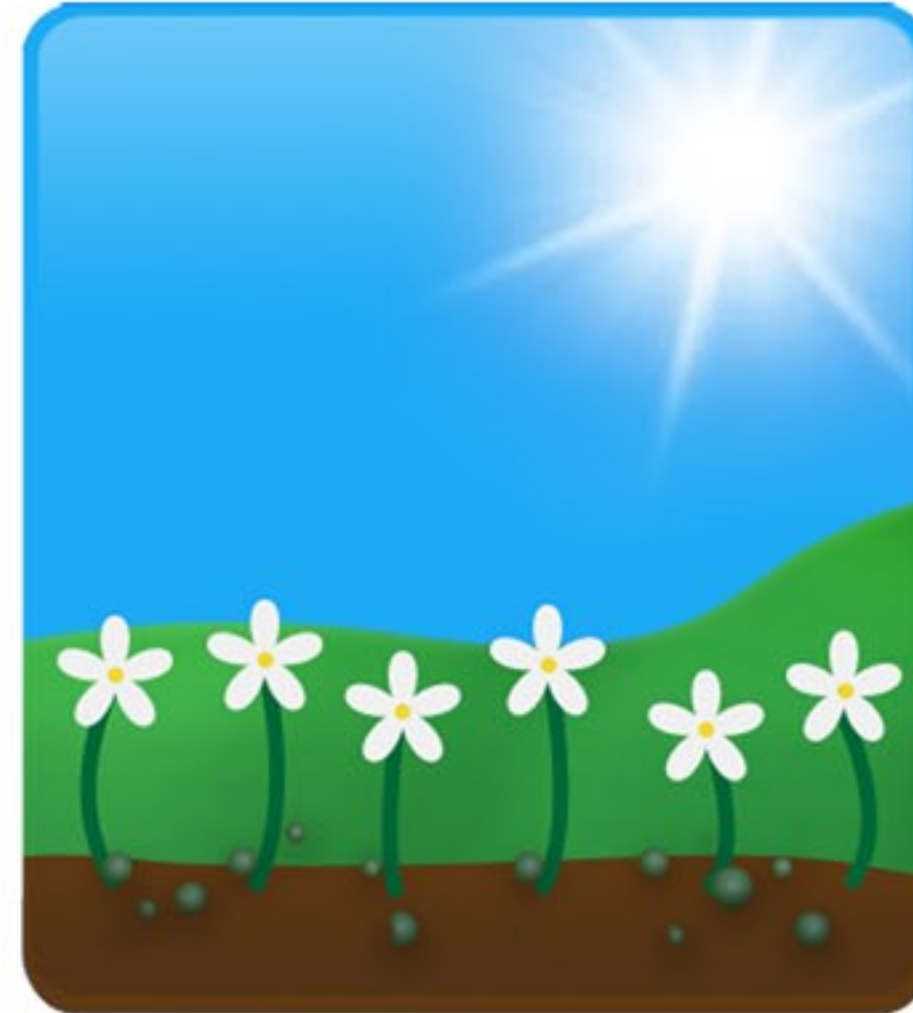

1. OPEN SIFTER CAP

SMELLEZE is extremely easy to use. To apply, simply open the handy sprinkle/pour top on the container and you are ready to absorb and deodorize tough outdoor smells.

2. SPRINKLE & DEODORIZE

Just scatter SMELLEZE liberally on the 'hot odor zones' created by the odor and you're done! SMELLEZE is 100% safe for people, pets, plants, and the planet!

3. SOLAR REJUVENATION

SMELLEZE is naturally rejuvenated in sunlight and heat for long lasting effectiveness even if it gets wet from rainfall or watering.

4. BONUS: ABSORB SPILLS

Scatter the 100% all-natural SMELLEZE generously on any liquid spill to absorb and trap it. Repeat if there is any liquid left. It can be used anywhere you have spills and odor.
